

Professional repair to
maintain your pump
performance

KEEPING IT
RUNNING

Maintenance and Repairs

Our lifetime services for your pumps

Maintain your pump performance

When it comes to servicing your pumps, GEA is a reliable partner. All work is carried out with the same care and precision that goes into the original production.

After a thorough inspection, we make sure we find the most customer-friendly solution while following our quality guidelines as well as your individual specifications.

This means that we also carefully check the feasibility of a cost-effective repair: defective parts can often be reworked or reused. In addition to the economic aspects, saving resources contributes to sustainability.

On site wear and spare parts stocks and manufacturing ensure a fast and professional overhaul of the pump in our factory.

Our know-how is your plus

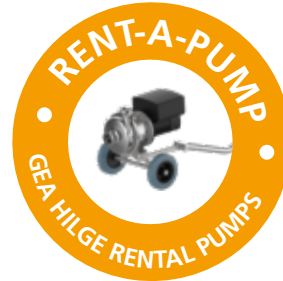

Our qualified pump experts stand for optimal overhaul. With their many years of experience, they are able to develop precise solutions to problems.

After the repair, all pumps are tested on our test bench to ensure performance. To keep your pump running smoothly, we offer a full consultation to create for you a tailored preventive maintenance program and recommendations for spare parts stocks.

Trust our service

Your benefits at a glance

- Professional repair on the same level of quality and precision as during production
- Your on-site processes remain completely unaffected
- Cost savings through reworking of parts instead of purchasing new parts
- Retrofitting of your pump to adapt to changes in production or applications
- Original spare parts and certificates
- Final test bench acceptance to ensure performance and quality after repair
- Recommendations for future professional operation of the pump
- Rental pumps to bridge repair time upon request
