ENERGIZING PHARMA. ENERGIZING YOU.

Less filtration, more yield, no CIP/SIP

Discover what a single-use disk stack separator can bring to your clarifying process: Maximum separation efficiency. Significantly reduced filtration area. Easy operation, saving time and labor. Ensured biocontainment. Get to know GEA kytero®, the high-yield cell harvesting solution – ready for the next batch in 5 minutes.

More benefits for you with GEA kytero®

- Maximum separation efficiency
- Less filtration, more yield
- No CIP/SIP, WFI or flush media required
- Fits into every cleanroom
- Batch ready in 5 minutes
- Contact-free free drive system GEA breezeDrive®
- Equipped for maximum safety

Easy operation concept

- Continuous operation without operator/supervision
- Less amount of disposables
- Fits through every common cleanroom door
- Reliable operation thanks to complete control equipment, fully adjusted

Scale up your success

- The GEA kytero® single use separator skid is available in two versions. kytero® 500 can process 500 L of input feed in a single batch. Test results from smaller batches can be upscaled to that capacity on the same machine.
- With the GEA kytero® 2000, you may scale up your success. Use the kytero® 500 as R&D and small batch machine and go into production with the kytero® 2000. Success is as simple as that.
