

GEA FARM TECHNOLOGIES GMBH
END USER LICENSE TERMS FOR GEA SOFTWARE PRODUCTS
(END CUSTOMER SOFTWARE AND RESELLER SOFTWARE)
AND AGREEMENT ON THE USE OF MACHINE DATA
WITH LICENSEES DOMICILED IN OR OUTSIDE GERMANY
(TOGETHER "**LICENSE AGREEMENT**", "**EULA**" OR "**LICENSE TERMS**")

Status: April 2025

This License Agreement governs Your ("**You**" or "**Licensee**") licensing of the GEA Farm Technologies GmbH, Siemensstraße 25-27, 59199 Bönen, Germany ("**We**", "**Licensor**" or "**GEA FT DE**") software product ("**Software**"), and contains provisions on the use of machine data collected in connection with the operation of the Software. This License Agreement does not contain any rules on the underlying purchase transaction ("**Software Usage Agreement**") that You have concluded either with Us (e.g. in the case of dealer Software or in the case of End Customer Software distributed directly by Us) or with one of Our national companies or with another sales partner of Ours or of one of Our local companies. By confirming this EULA (e.g. by clicking on a corresponding button), You declare Your acceptance of this License Agreement, which is concluded between You and GEA FT DE, and that You are acting in Your capacity as an entrepreneur, which means that You are an adult natural or legal person or company with legal personality acting in the exercise of Your commercial or professional activity. GEA FT DE waives receipt of Your declaration of acceptance to this EULA. This EULA does not regulate any additional services, such as the installation, setup, commissioning, customisation, implementation, hosting, maintenance, support, etc. of the Software. General terms and conditions of the Licensee are hereby excluded.

1. License

- 1.1 The Licensor is always only GEA FT DE, even if You have concluded the Software Usage Agreement with another national company or a sales partner.
- 1.2 Unless otherwise provided for in these License Terms, GEA FT DE grants the Licensee a non-exclusive, non-transferable and non-sublicensable right to use the Software for its own business purposes in accordance with these License Terms, limited in time to the duration of the respective Software Usage Agreement. Rights of use that are not expressly granted to the Licensee in these License Terms remain with GEA FT DE.
- 1.3 Depending on the content of the respective Software Usage Agreement, the Software is used by the Licensee either by remote access to the Software via the Internet (also known as "**SaaS**") or by providing the Licensee with a physical copy of the Software ("**On Premise**"). On Premise Software can generally only be used with an Internet connection. This is because On Premise Software is regularly checked automatically (via the Internet)

to ensure that the On Premise Software is (still) properly licensed.

- 1.4 Unless otherwise agreed, the Licensee may only install On Premise Software on one data processing unit at a time and use it by any number of users. Unless otherwise agreed, users may be not only the Licensee and its employees but also the Licensee's contractors and the Contractor's employees. However, the Licensee must oblige the Contractor and its employees to comply with this EULA at all times.
- 1.5 Unless otherwise agreed, the Licensee may not copy On Premise Software unless this is technically necessary in order to install or execute the Software. In particular, copying the Software as part of an application service providing (ASP), SaaS or cloud computing concept is prohibited. However, the Licensee is entitled to make a backup copy if and to the extent that it is entitled to use the Software under these License Terms and the backup copy is required to secure future use. These License Terms also apply to backup copies.
- 1.6 The Licensee may not modify, decompile, disassemble or otherwise reverse engineer or otherwise modify the Software, unless this is expressly permitted by applicable law and GEA FT DE has refused to grant such rights. The Licensee is prohibited from removing copyright notices, trademarks or other references to existing copyrights or exclusive rights of use from the Software.
- 1.7 Unless expressly agreed otherwise, the Licensee may not make the Software available to third parties for permanent or temporary use. In particular, the Licensee is prohibited from renting, lending, selling, publicly reproducing or making the Software publicly accessible.
- 1.8 All rights of use granted to the Licensee are subject to the timely and complete receipt of the payment owed by Licensee for the use of the Software (insofar as such payment is owed). Until full payment has been received, GEA FT DE is free to revoke the rights of use - which until then have only been granted provisionally - at any time without notice. The Licensee therefore bears the risk that any intermediary distribution partner through which the Licensee obtains the Software under the law of obligations will properly fulfil its payment obligations to GEA FT DE. Otherwise, despite proper

fulfilment of the Licensee's payment obligations to its contractual partner, the rights of use may be revoked. Section 1.9 of this EULA remains unaffected.

- 1.9 GEA FT DE may decide to make Software available free of charge (e.g. for time-limited trial versions or basic versions of Software with reduced functionality) (here: "**Free Version**"). This EULA also applies to Free Versions. Section 1.8 of this EULA does not apply to Free Versions.
- 1.10 All rights to the Software (e.g. patent rights, trademarks, copyrights and other intellectual property rights) remain with GEA FT DE and are not transferred to the Licensee by these License Terms, unless expressly agreed otherwise. The Licensee shall not be entitled to the source code and/or the development documentation.
- 1.11 These License Terms apply to all copies of the Software made by the Licensee or on its behalf and, accordingly, to new Software versions such as updates (these ensure the continued usability of the existing functionality without containing new functionality for the Software), upgrades (these provide - exclusively or additionally - new functionality for the Software), patches (small software packages for the pure and sometimes only temporary correction of errors in the Software) or releases (new consolidated Software versions into which the previous updates are incorporated), which are supplied to the Licensee by GEA FT DE or, with the consent of GEA FT DE, by a third party. For the avoidance of doubt, GEA FT DE does not owe the Licensee any provision of updates, upgrades, patches or releases.
- 1.12 Different rights of use may apply to certain components of the Software. As far as components under open-source license terms are concerned, GEA FT DE provides an overview of the components and their respective licenses within the respective Software, including the applicable license terms or a link to the applicable license terms. With regard to the components listed there, only the indicated or linked deviating license terms apply and not this EULA.
- 1.13 The use of the Software as a whole or certain functions of the Software may be dependent on the Licensee maintaining a valid agreement for the use of DairyNet Cloud. DairyNet Cloud is a service offered by GEA FT DE to which separate portal terms of use apply and via which cloud-based GEA products can be activated and managed. If the Licensee does not (or no longer) have a valid agreement for the use of DairyNet Cloud, the Licensee's right to use the Software may automatically lapse.
- 1.14 The Software may include AI-supported functions. Such functions merely represent non-binding aids that do not claim to be complete or correct and that depend on the quality of the processed data. A classification or evaluation made by the AI may change during the period of use. The output generated by the AI is always only an estimate, which is factually correct at the

respective point in time with a certain degree of probability, but does not claim to be absolutely correct. The Licensee is obliged to carefully check such estimates manually before the Licensee takes action on the basis of estimates displayed in the Software. This applies in particular to such measures that could have negative material or immaterial effects on the Licensee and/or third parties.

2. Obligation of the Licensee to back up Data

The Licensee is obliged to back up the data generated and entered with the Software at regular intervals, but at least once per day of use, in sufficient form on separate data carriers and thus to ensure that this data can be restored promptly with reasonable effort even in the event of data loss (e.g. due to an unforeseen failure of the GEA FT DE servers or due to a database error).

3. Further Obligations of the Licensee

- 3.1 The Licensee declares that by storing data within the Software, it does not infringe either statutory provisions or the rights of third parties (in particular copyright and data protection rights). In this respect, the Licensee shall indemnify GEA FT DE against any third-party claims. The assertion of further claims by GEA FT DE remains unaffected.
- 3.2 The Licensee also assures not to store any data within or with the help of the Software that could endanger the existence or operation of the Software, the data centre or data network of GEA FT DE or third parties (e.g. through computer viruses).
- 3.3 In the event of infringement of No. 3.1 sentence 1 or No. 3.2 GEA FT DE shall be entitled to remove the unlawful data and/or block access to it. Statutory claims for damages by GEA FT DE remain unaffected.

4. Third Party Rights

- 4.1 If a third party asserts claims against the Licensee in relation to the use of the Software or its components, the Licensee shall inform GEA FT DE of this immediately in text form. The Licensee authorises GEA FT DE to defend against the assertion of these claims and/or to conclude a settlement at the reasonable discretion of GEA FT DE. The Licensee shall provide GEA FT DE with all information and assistance necessary for the defence against the assertion of such claims and shall not enter into its own settlements in relation to the claims without the prior written consent of GEA FT DE.
- 4.2 In no event shall GEA FT DE be liable for any infringement of third party rights resulting from (i) the Software being combined with products or software not supplied by GEA FT DE or without the consent of GEA FT DE and of which GEA FT DE has not been expressly informed in writing, (ii) the Software being extended or modified by GEA FT DE on the instructions of the Licensee or other persons, (iii) the acts in question constituting breaches of these License Terms or (iv) the Licensee using a non-updated version of the Software. However, liability is not excluded under this

No. 4.2 if the Licensee can prove that the infringement is not based on one of the aforementioned actions.

5. Processing of Machine Data and the Rights of the Licensee

5.1 Software (also referred to in this EULA as "**End Customer Software**") or the product to which the End Customer Software is connected (together: "**Data-Generating Object**") used by End Customers in operational/agricultural use can generate Product Data and Connected Service Data during operation and in idle mode.

"**Product Data**" means data generated through the use of a connected product that the manufacturer has designed so that the data can be accessed by a user, data owner or third party via an electronic communication service, physical connection or on-device access.

"**Connected Service Data**" is data that represents the digitisation of user actions or processes in connection with the connected product and is intentionally recorded by the user or generated as a by-product of the user's action during the provision of a connected service by the provider.

"**End Customers**" within the meaning of this EULA are those persons who operationally use Software and other products of GEA FT DE for agricultural purposes (in particular farmers) and are not merely involved in the distribution of GEA products (such as sales partners in particular). For Software that is used solely by sales partners (e.g. for sales analyses), No. 5 and 6 of this EULA do not apply.

In connection with the use of the End Customer Software, raw data may be collected from the data-generating object or a connected service ("**Machine Data**").

5.2 The Machine Data will be transmitted to GEA FT DE, stored by GEA FT DE for a period of at least 24 months and used in particular for the following purposes:

- Improving the functionality of networked products and connected services;
- Development of new products or services;
- Troubleshooting;
- Product monitoring;
- Provision of optimised product support and service/product information for the Licensee and third parties;
- Determination of benchmarks and optimisation potential;
- Developing, manufacturing, automating, improving, monitoring and/or maintaining equipment, software, cloud-based solutions, processes and services;
- Creation and further development of algorithms, statistical analyses and AI solutions;
- Optimisation of contract implementation;
- Support for marketing and sales activities;
- Generation of Derived Data;

- Aggregation of data with the aim of utilising the resulting Derived Data and making it available to third parties.

"**Derived Data**" means (i) any data or information derived from the Machine Data, including, but not limited to, statistical or other analytical data derived using algorithms or the application of proprietary software, (ii) any data or information derived by means of sensor fusion or other similar means or methods, and (iii) any data where the Machine Data is aggregated with other data (provided that such aggregated data does not identify the Machine Data of the Data Generating Item or allow a third party to derive such data from an aggregated data set).

5.3 GEA FT DE intends to disclose the Machine Data to companies affiliated with GEA FT DE pursuant to Section 15 AktG and other third parties for the above purposes. The Licensee hereby requests GEA FT DE to disclose the Machine Data to companies affiliated with GEA FT DE pursuant to Section 15 AktG (see <https://www.gea.com/en/contact>) and other third parties listed on the Internet at <https://www.gea.com/en/legal/dairy-farming>.

5.4 During the term of the contract, the Licensee (only those Licensees who are also End Customers within the meaning of this EULA) can access the Machine Data and the metadata required for its use via a user interface of the Software and export it at any time. Until the end of the third month following the termination of the contract, the Licensee (only those Licensees who are also End Customers within the meaning of this EULA) may request a copy of the Machine Data provided or generated by them.

5.5 Data transfer requests and other enquiries regarding the handling of Machine Data (e.g. with regard to the desired termination of data transfers) can be sent by the Licensee by e-mail to data-protection.digital.ft@gea.com.

5.6 The Licensee (only those Licensees who are also End Customers within the meaning of this EULA) has the right to lodge a complaint with the competent authority in accordance with EU Regulation 2023/2854 (EU Data Regulation) if it considers that GEA FT DE is in breach of any of the provisions of Chapter 2 of the EU Data Regulation.

5.7 GEA FT DE is not obliged to grant access to Machine Data or to make such data available if this (i) would lead to the disclosure of a trade secret, (ii) could compromise the security of the data collection object (including embedded software), or (iii) would lead to the disclosure of data on the testing of new products or processes that are not yet on the market.

5.8 If GEA FT DE provides the Licensee with Machine Data or Derived Data, GEA FT DE provides no warranty, guarantee or similar assurance in relation to these. In particular, GEA FT DE does not warrant that the data provided will fulfil the purposes pursued by the Licensee, unless expressly agreed otherwise.

- 5.9 GEA FT DE is authorised to delete stored Machine Data at any time at its own discretion after a retention period of 24 months.

6. Utilisation of Machine Data

- 6.1 The Licensee grants GEA FT DE, free of charge, a perpetual, worldwide, non-exclusive, transferable and sub-licensable right to use Machine Data for one or more of the purposes listed under No. 5.2 to collect, process, analyse, store, aggregate and/or otherwise use Machine Data for one or more of the purposes set out in No. 5.2. In particular, GEA FT DE and GEA FT DE's service technicians are entitled to access all Machine Data that may be transmitted by the Data Generating Object at any time without prior notice to and without the consent of the Licensee.

- 6.2 The right granted to GEA FT DE above under No. 6.1 is irrevocable.

- 6.3 All rights to Derived Data are the exclusive property of GEA FT DE.

7. Confidentiality, Prohibition of Use by Third Parties

- 7.1 All information which one party provides to the other party in connection with the Software or the services to be provided under further contracts and which is expressly marked in writing as confidential or which is recognisable as business secrets under the circumstances (here in relation to these confidentiality rules: "Information") may only be used for the purposes of these License Terms and must be protected by the recipient against unauthorised access in the same way as the recipient treats its own confidential Information in cases of the same or similar importance. In all cases, however, Information must be treated with reasonable care. The Information includes, but is not limited to, data, software, license keys, passwords, customer data, product and marketing data, product plans, designs, beta versions and documentation. The obligation of confidentiality or restricted use of the Information does not apply to Information (i) which is publicly available, (ii) to which the party concerned already had access prior to disclosure, or (iii) which this party received from third parties without being obliged to maintain confidentiality, or (iv) which this party developed independently of the respective Information. The Licensee acknowledges that the Software and the applications by means of which GEA FT DE operates the Software is commercially valuable property of GEA FT DE, for the design and development of which GEA FT DE has incurred considerable investment and costs. Software and documentation are also deemed to be Information even if they are not expressly labelled as confidential in writing. Notwithstanding mutual duties of consideration (e.g. in connection with the generation of Derived Data), Machine Data pursuant to No. 5.1 shall not be deemed Information within the meaning of this Confidentiality Agreement.

- 7.2 Unless expressly agreed otherwise, the Licensee may not grant third parties access to the Software either permanently or temporarily. In particular, the

Licensee is prohibited from making the access data for the use of the Software available to third parties for a fee or free of charge, or from making it publicly accessible. In particular, the Licensee is obliged to keep the access data (e.g. passwords, user names, etc.) strictly confidential and to protect them from access by third parties in a secure location. The Licensee undertakes to inform GEA FT DE immediately in writing (e-mail is sufficient in this respect) as soon as the Licensee becomes aware that unauthorised third parties are aware of access data. In the event that, due to the fault of the Licensee, third parties use GEA FT DE services through the use of this data, the Licensee is liable to GEA FT DE in particular for usage fees and damages.

8. Audit Rights and License Verification

- 8.1 GEA FT DE is authorised to examine and monitor - also electronically via remote access - compliance with the rights of use. For these purposes, GEA FT DE is authorised to enter the relevant premises of the Licensee where the Software is used. The Licensee shall provide GEA FT DE with appropriate support in the investigation, e.g. by granting access to computers and providing the necessary information, such as the number of users, workstations used, etc.
- 8.2 GEA FT DE reserves the right to restrict the Software once an infringement has been detected. Further rights and claims of GEA FT DE remain unaffected by this.

9. Liability

- 9.1 Claims for damages in favour of the Licensee are excluded, irrespective of the type of breach of duty, including tortious acts, except in cases of wilful intent or negligence.
- 9.2 In cases of simple negligence, GEA FT DE is only liable for the breach of such obligations that are intended to enable the execution of the License Agreement and on whose compliance the Licensee may regularly rely (here: "Cardinal Obligations"). In cases of simple negligent breach of Cardinal Obligations, the liability of GEA FT DE is limited to the typically foreseeable damage.
- 9.3 For Free Versions, GEA FT DE is only liable for intent and gross negligence, contrary to No. 9.2 of this EULA
- 9.4 GEA FT DE's liability for damages is excluded in the case of No. 9.2 is limited to 100% of the remuneration paid by the Licensee for the licensed Software, but to a maximum of EUR 5,000.00.
- 9.5 In the event of data loss, VP's failure to fulfil its obligation to back up data in accordance with No. 1.14 the liability of GEA FT DE is limited (i) to the effort that would have been necessary to restore the data from a proper data backup, and (ii) to the damage caused by the loss of current data that would have been lost even with a proper data backup. GEA FT DE is not liable for damages caused by loss of data, insofar as these are attributable to a faulty Internet connection or one that is interrupted during data transmission.

- 9.6 The limitations of liability and exclusions in this No. 9 shall not apply to liability for guaranteed characteristics, for claims under the German Product Liability Act, for fraudulently concealed defects and for damages resulting from injury to life, limb or health.
- 9.7 Insofar as the liability of GEA FT DE is excluded or limited, this also applies to employees, workers, representatives and vicarious agents of GEA FT DE.

10. Statute of Limitations

Unless expressly agreed otherwise, any liability claims of the Licensee against GEA FT DE shall become time-barred within one year from the start of the statutory limitation period. A corresponding limitation period shall apply to the assertion of rights in the event of liability.

11. Term/Cancellation

These License Terms shall apply until the expiry of the Software Usage Agreement agreed between the Licensee and its contractual partner (either GEA FT DE or another national company or other sales partner of GEA FT DE or another national company), or until this contract has been effectively terminated by one of the parties. Termination of the contract (for whatever reason) shall have no influence on those provisions of these License Terms that are intended to expressly or impliedly survive termination of the contract. In particular, the provisions on confidentiality and rights of use to Machine Data shall continue to apply.

12. Data Protection

GEA FT DE will process personal data as described in the privacy policy (available at: <https://www.gea.com/en/legal/dairy-farming>).

13. Changes to the License Terms

- 13.1 GEA FT DE reserves the right to amend these License Terms at any time if this is necessary. An amendment is necessary if GEA FT DE wishes to include provisions that favour the Licensee, if loopholes are discovered or if changes in the legal situation or case law make an amendment necessary. If GEA FT DE changes these License Terms, GEA FT DE will provide the Licensee with a notification of the change (e.g. when the Licensee accesses the Software, the dealer portal, or DairyNet Cloud, or by sending a message via the sales partner). The Licensee has the right to object to a change to the License Terms in writing (at least in text form) within a period of four weeks. GEA FT DE is obliged to expressly inform the Licensee of this right of objection and the legal consequences of not objecting or not objecting in due time in the notification of the change to the License Terms. Should the Licensee continue to use the Software (or parts thereof) after receipt of the notification of a change without objecting to the change, the Licensee thereby indicates agreement to the amended License Terms upon expiry of the aforementioned period, whereby these shall become binding upon expiry of the aforementioned period.

- 13.2 Should the Licensee object to the amended License Terms, GEA FT DE has the right to terminate the License Agreement subject to a notice period of one month. In such a case, GEA FT DE will endeavour to reimburse the Licensee (via the sales partner, if applicable) for any remuneration already paid by the Licensee for the remaining term of the Software Usage Agreement on a pro rata basis or to ensure that no further costs are collected.

14. Final provisions

- 14.1 Persons who are not parties to the License Agreement are not entitled to claim or make use of the benefits arising from this License Agreement and do not fall within the scope of protection of this License Agreement.
- 14.2 These License Terms and all matters arising from or in connection with the License Agreement (including non-contractual obligations) shall be governed by German substantive law. Subject to the following sentence, the exclusive place of jurisdiction is Dortmund, Germany. However, GEA FT DE is also entitled to bring an action at the place of business of the Licensee.
