Regardless of the application – for our customers product quality and profitability are what matters. This is what GEA Flow Components is known for. Our engineers are specialists in everything that flows.

GEA Group Aktiengesellschaft

GEA is one of the largest suppliers of process technology for the food industry and for a wide range of other industries. As an international technology group, the company focuses on world-leading process solutions and components for sophisticated production processes.

GEA Flow Components

GEA offers well-engineered process components and services to ensure smooth production processes in the treatment of liquid products. We develop and produce a comprehensive product range that includes valve technology for all hygienic classes (Hygienic, UltraClean, Aseptic), hygienic pumps and cleaning technology.

GEA Flow Components products and services are available around the world through the international GEA network.

Around one quarter of the milk processed is handled by GEA equipment

Roughly every second liter of beer is brewed using GEA equipment and solutions

Every fourth liter of human blood is handled by GEA equipment

State-of-the-art hygienic design

GEA Flow Components meet the highest hygienic standards where required, such as EHEDG and 3-A standards.

Hygienic valves and components from GEA form the core component of matrix-piped process plants.

When it comes to sterile applications, GEA offers both UltraClean and Aseptic valves and systems. The hermetic sealing of the product area provides a maximum level of process line isolation and thus contributes to process and product safety.

The hygienic pump range from GEA includes centrifugal pumps (single-stage, multi-stage and self-priming), as well as rotary lobe pumps.

GEA cleaning devices – whether index, orbital, rotary or static – achieve optimum cleaning results in multiple industries. GEA product recovery systems help to recover valuable products and reduce both waste disposal costs as well as water and detergent consumption.

Applications

- Beverages
 - Beer, juice, smoothies, and more
- Dairy processing
 - Milk, yoghurt, cheese, and more
- Food
 - Sauces, pastes, ketchup, mayonnaise, and more
- Pharma/Biotech
 - Pharmaceuticals, biotech, cosmetics, health care, and more
- Chemicals
 - Fine chemicals, bulk chemicals, cleaning agents, and more

Hygienic Valve Technology

A complete range of economically designed Hygienic valves for complex tasks as well as basic functions, helping producers to achieve high product quality and efficiency.

Aseptic Valve Technology

UltraClean and Aseptic valves are suitable for production processes which require a higher safety protection against contamination from the environment and thus warrant microbial stability of the product over the whole process.

Hygienic Pump Technology

A great variety of Hygienic pumps with sensibly rated high efficiency motors and carefully designed flow paths, driving economic efficiency and sustainable operation.

Cleaning Technology

Index, orbital, rotating and static cleaners in a complete range, developed with special emphasis on saving valuable resources in the cleaning process.

Gentle product handling, continued reliability and economic efficiency are key characteristics of the state-of-the-art hygienic pumps in the GEA Flow Components range.

Maximum reliability and cost control

Because GEA customers rely on the safe, continuous operation of their production systems, GEA pumps are optimized for uncompromising reliability in all applications. The great number of pumps currently in operation is proof of their robust design, long service life and ease of maintenance.

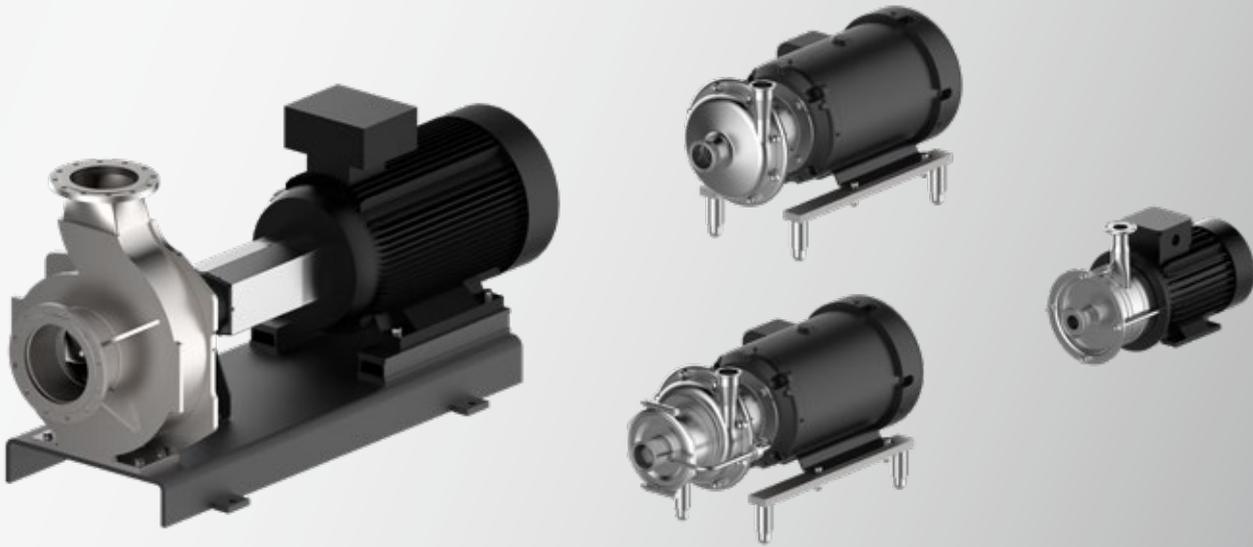

Applying GEA pumps to production processes can significantly reduce operational costs. Sensibly rated high-efficiency motors in all the required dimensions keep energy consumption as low as possible. The product is conveyed evenly and gently for higher product quality and improved processing and distribution options.

Economical

Higher product quality

Reduced consumption of energy, water and cleaning media

Reduced time and personnel costs for maintenance and cleaning

Hygienic and sustainable design

GEA pumps comply with all relevant hygiene standards and norms, with continuous documentation and up-to-date certifications safely ensuring judicial security.

Carefully designed flow paths free of dead zones ensure optimum cleaning and utilization of the conveying energy. Lower consumption of energy, water and chemicals helps to protect climate and environment, observe international regulations and promote the producer's standing with customers and authorities.

Long-term partnership

The GEA Hilge Hygienic Pumps Competence Center situated in Bodenheim, Germany, is the primary point of contact for GEA customers and partners to plan individual solutions. The worldwide GEA sales and service network provides further assistance with support offers covering the entire lifecycle of the pump.

Sustainable

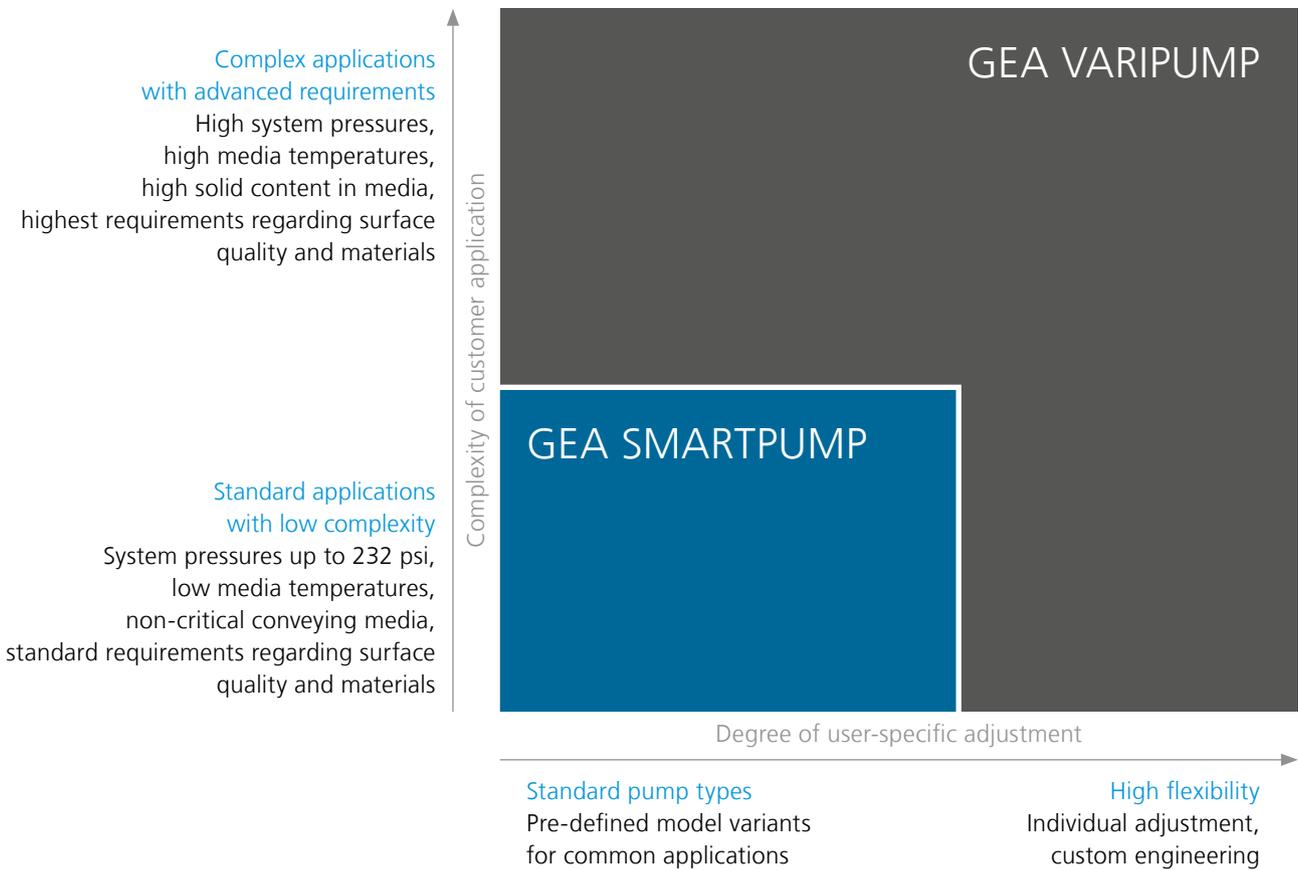

- Lower climate and environmental impact
- Sustainable, environmentally friendly production processes
- High standards for hygienic processing and care of products

Service-oriented

- Individual engineering support
- Shortest possible downtime of production
- Individual service concept

Two modern pump lines for maximum efficiency

Two product lines, GEA VARIPUMP and GEA SMARTPUMP, form a highly versatile pump range with a multitude of adaption options to ensure simpler operation, higher-quality production, and reduced consumption of valuable resources.

GEA VARIPUMP

The pump series in the GEA VARIPUMP line have been conceived for extreme application demands. The pumps are individually optimized by GEA for each task.

GEA VARIPUMP models are made entirely without die-cast components, offering high-quality surfaces and materials that meet stringent demands even in the sensitive pharmaceutical industry, further ensured by complementing services, e.g. Witnessed Factory Acceptance Test (FAT).

With a great variety of set-up and customizing options the pumps can be adapted individually to any production process, for lower operational costs and maximum system efficiency.

- Developed for advanced application conditions
- Project-specific customization
- Surface roughness up to $R_a \leq 16 \mu\text{in}$ ($0.4 \mu\text{m}$)
- Product-wetted materials according to specific requirements (e.g. no cast parts, $F_e \leq 1\%$ optional)

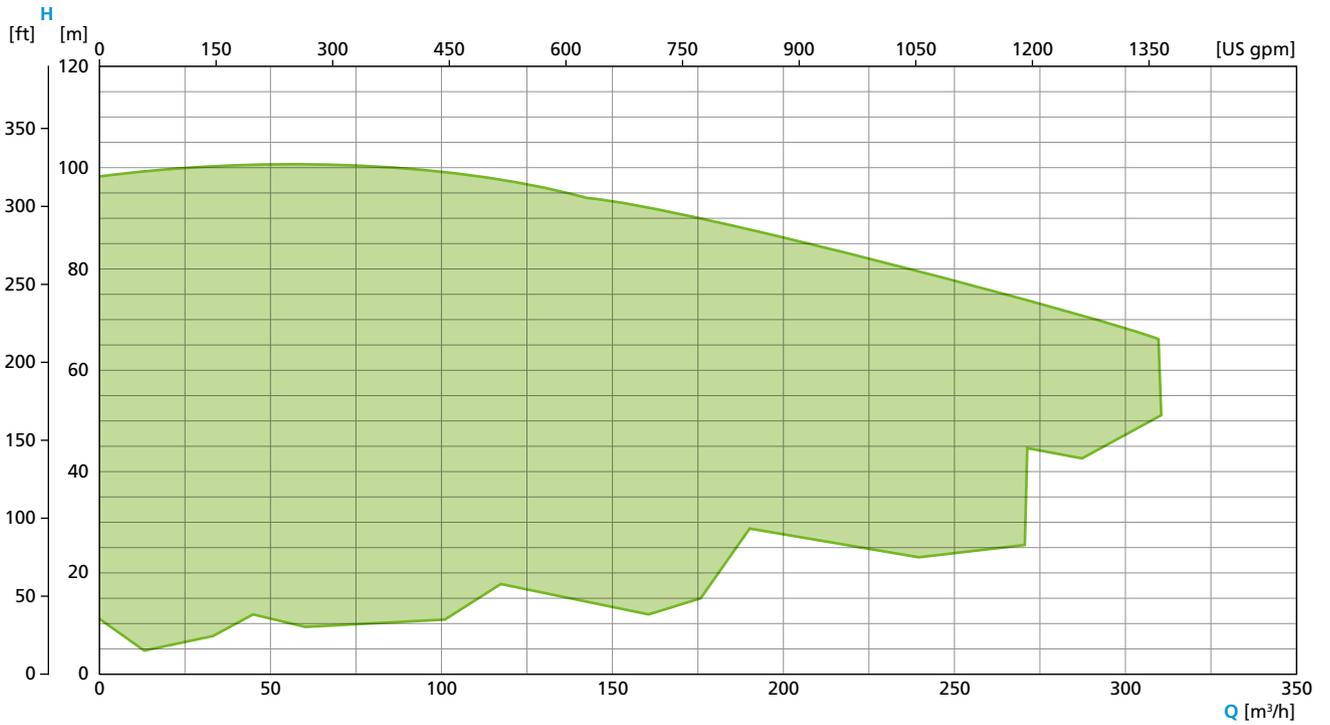

GEA SMARTPUMP

The GEA SMARTPUMP line comprises highly standardized and attractively priced pump series for common, often-used applications at standard conditions. The pumps are easy to select and ready for fast delivery. Within pre-defined parameters, the standard models can be configured to individual tasks.

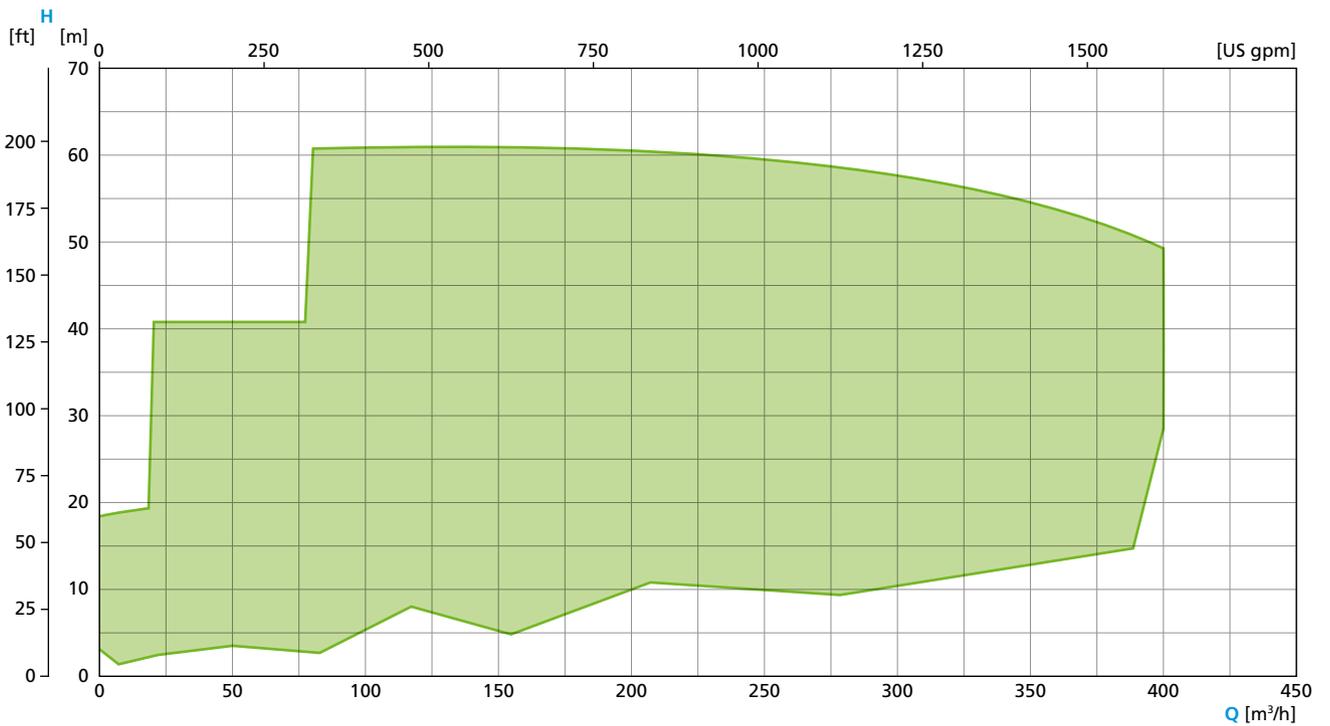

The modular construction using high-value materials, the proven “Hygienic Design” and easy-to-apply standardized spare parts all recommend GEA SMARTPUMP pumps for use in cost-critical production systems – at no compromise in terms of quality.

- Application for common and clearly defined “standard” process tasks
- Simple selection and configuration
- Fast delivery
- Standardized spare parts

GEA Hilge HYGIA/HYGIA H

The “Swiss Knife” among the hygienic pumps. Premium quality and highest flexibility of customization ensure successful application in the food, beverage, and pharma industries. Also available as high-pressure execution.

Technical data	50 Hz	60 Hz
Flow rate	881 US gpm	771 US gpm
Head	236 ft	345 ft
System pressure	232/363/928 psi	

GEA Hilge MAXA

A single-stage centrifugal pump designed for heavy-duty operation in industrial processes. The major dimensions and characteristics of these pumps correspond to DIN EN 733 and DIN EN 22858.

Technical data	50 Hz	60 Hz
Flow rate	6,384 US gpm	6,384 US gpm
Head	328 ft	328 ft
System pressure	145 psi	

GEA VARIPUMP	Wide model range with numerous variants. Customization to specific customer requirements	GEA Hilge HYGIA		GEA Hilge MAXA	
Single-stage end-suction centrifugal pumps					
GEA SMARTPUMP	Clearly defined list of models, limited to standard requirements, no other variants	GEA Hilge TP			

GEA Hilge TP

The GEA Hilge TP is the smart solution for standard applications. The single-stage centrifugal pump suits a wide range of applications and offers uncompromising hygiene and quality.

Technical data	50 Hz	60 Hz
Flow rate	969 US gpm	1,057 US gpm
Head	312 ft	427 ft
System pressure	232 psi	

GEA Hilge SIPLA

A single-stage self-priming side channel pump, especially suited for SIP/CIP return systems and applications with high gas content. Right- and left-hand rotation can be freely adjusted for additional application options.

Technical data	50 Hz	60 Hz
Flow rate	343 US gpm	282 US gpm
Head	154 ft	197 ft
System pressure	145 psi	

GEA Hilge CONTRA

Single- and multi-stage centrifugal pumps are available in this series. The hygienic design in every detail provides perfect solutions to numerous tasks in sterile and hygienic processes.

Technical data	50 Hz	60 Hz
Flow rate	176 US gpm	154 US gpm
Head	525 ft	755 ft
System pressure	363 psi	

GEA Hilge NOVALOBE

This rotary lobe pump has been specifically designed for highly viscous media – and for applications where gentle pumping or dosing is required. The pump is fully drainable and EHEDG certified.

Technical data	50/60 Hz
Cavity volume	0.34 gallons/rev
System pressure	145/232 psi

Single-stage self-priming centrifugal pumps

Multi-stage centrifugal pumps

Rotary lobe pumps

GEA Hilge TPS

This self-priming centrifugal pump is the solution of choice especially for emptying tanks as well as for conveying products containing gas, e.g. CIP return systems.

Technical data	50 Hz	60 Hz
Flow rate	550 US gpm	682 US gpm
Head	312 ft	453 ft
System pressure	232 psi	

GEA Hilge DURIETTA

This end-suction single- or multi-stage centrifugal pump in a very compact design has been created for applications with low flow rates at high flow heads.

Technical data	50 Hz	60 Hz
Flow rate	35 US gpm	35 US gpm
Head	236 ft	135 ft
System pressure	116 psi	

The certificates listed here are valid for corresponding GEA pump models. Pumps conforming to the requirements of the European Hygienic Engineering and Design Group (EHEDG) as well as 3-A Sanitary Standards, Inc. (3-A SSI) are available for numerous fields of application.

Moreover, independent, standardized tests have confirmed the efficient, problem-free cleaning ability of numerous pumps – for optimum safety and economic gain.

EHEDG certificates apply only to the specific pump type as listed. However, they may be transferred to specific other pump types, owing to identical housing designs and flow path geometries.

GEA Hilge Centrifugal Pump TP

The GEA Hilge Centrifugal Pump TP is designed for pumping demanding media up to a viscosity of 1,000 mPas. Low flow velocities and gentle discharge of media through the spiral housing ensure extremely gentle product handling and high efficiency.

11 pump sizes with a capacity range of up to 1,057 US gpm and pump heads of up to 427 ft w.c. are available, finely tuned to the task at hand.

The spiral housing for the TP series is made of cold-rolled steel. This material has an excellent surface quality, which is essential for optimum cleaning in CIP/SIP processes. Wall thicknesses up to 8 mm provide high strength for critical piping configurations and high inlet pressures.

GEA Hilge TP on 3-A stainless steel adjustable feet

Technical Data

	50 Hz	60 Hz
Head	up to 312 ft	427 ft
Flow Rate	up to 1,057 US gpm	
Operating pressure	up to 232 psi	
Operating temperature	max. 212 °F	
Sterilization temperature	max. 289 °F (SIP)	
Max. pump efficiency	72 %	

Applications

The GEA Hilge TP pump range is suitable for the following application areas and products, due to the hygienic design and material selection:

Breweries

- Beer, wort, yeast, water, CIP solutions

Dairies

- Milk, cream, yoghurt, whey, brine, CIP solutions

Food

- Oils, sauces, stock, brine, flavours, ice-cream mix, CIP solutions

Fields of applications

- Conveying, circulation, pressure boosting, filling lines, filling, emptying, filtration, evaporation, cleaning

Design

GEA Hilge TP pumps are single-stage, end-suction, centrifugal pumps, designed to meet the hygienic requirements of sterile process technology.

The pumps are available in eleven sizes with a variety of flexible versions. The pumps are CIP- and SIP-capable in compliance with the DIN EN 12462 performance criteria. The design fulfills the following requirements:

- 3-A Sanitary Standard
- QHD criteria
- EHEDG (registered for recertification)
- EAC
- GMP regulations

Certification

ATEX

For use in potentially explosive areas, Adapta pumps are available. These pumps, which possess an EC declaration of conformity in accordance with the ATEX guideline 2014/34/EU, correspond to device categories 2 or 3, and can be used in zone 1 or 2.

ATEX-Symbol

For explanation see chapter certificates on page 26. The pumps fulfil the following surface requirements in terms of the wet end parts:

- Standard: $R_a \leq 125 \mu\text{m}$ (3.2 μm)
- Optional: $R_a \leq 32 \mu\text{m}$ (0.8 μm)

The pump casing is made of heavy-duty, rolled and deep drawn CrNiMo steel 1.4404/1.4435, the equivalent of AISI 316L. The pumps have a mechanical seal and a fan-cooled asynchronous motor to enclosure class IP55.

Open impeller design

- All parts stainless steel, wetted components made of 1.4404 or 1.4409 (AISI 316L)
- Surface roughnesses of $R_a \leq 32 \mu\text{in}$ can be achieved by mechanical treatment of the surface
- Driven by premium efficiency IE3 motors, design type IM B35, according to IEC

Semi-open impeller

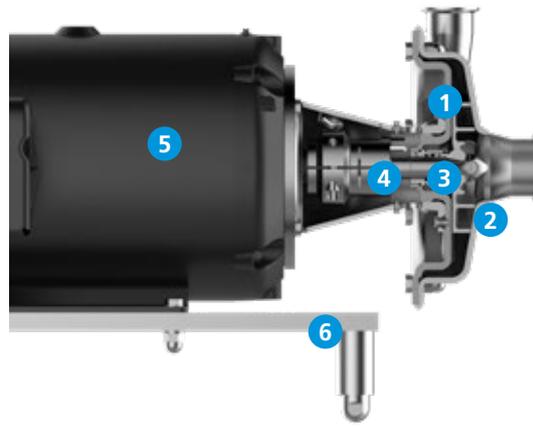

The electro-polished, stainless steel, semi-open impeller is available in two versions, according to the application.

Impeller version	Surface finish
Cast	$R_a \leq 125 \mu\text{in}$ (3.2 μm)
Cast	$R_a \leq 32 \mu\text{in}$ (0.8 μm)

The impeller is suitable for low-viscosity liquids and liquids containing low content of particles.

Materials

Material overview GEA Hilge TP

Item	Component	Material	No.
1	Impeller	CrNiMo steel	316L (1.4409)
2	Pump casing	CrNiMo steel	316L (1.4404)
3	Seal	Single mechanical seal carbon/stainless steel, SiC/SiC and carbon/SiC	
4	Pump shaft without key	CrNiMo steel	316L (1.4404)/304 (1.4301)
5	Motor	Rolled steel, cast iron	
6	Foot	Stainless steel	

Intended use of motor

The range of motors differentiales general purpose and wash-down motors. These types vary in resistance against humidity and general conditions in the plants. We recommend the use of wash-down motors in case one or more of the following boundary conditions apply:

- Continuous exposure to high-humidity (100 %) environments
- Continuous exposure to saline (5 %) environments
- IP X6 (Water projected in powerful jets – 0.5 inch nozzle – against the enclosure from any direction, Water volume: 26.42 gallons per minute, Pressure: 0.15 psi at distance of 9.84 ft)
- Use of alkaline cleaners such as Potassium Hydroxide or Sodium Hydroxide at low concentrations during wash-down routines
- Presence of animal fats, mineral or vegetable oils, detergents or ethylene glycol

Coating

Components not made of stainless steel are provided with one of the following coatings, depending on the design:

Version	Paint/coating	Coating thickness
Primer	2K epoxy resin	1,181–2,362 µin (30–60 µm)
	KTL coating	591–787 µin (15–20 µm)
Top coating	2K epoxy resin	1,969–2,756 µin (50–70 µm)
	2K polyurethane color	2,362 µin (60 µm)
	KTL coating	591–787 µin (15–20 µm)

Surface design

Selected components are electro-polished in order to improve the surface and protect it against corrosion.

Surface	Electro-polished components
$R_a \leq 125 \mu\text{in}$ (3.2 µm)	Casing
$R_a \leq 32 \mu\text{in}$ (0.8 µm)	All components that come into contact with the pumped fluid

Lantern (motor stool) and cast impeller not electro-polished.

Sealing according to the VARIVENT® principle

The special groove ensures that the seal is kept reliably in place at all times. The shape of the groove is based on FEM analyses. The metallic stop allows a defined compression of the seal, ensuring gap-free sealing against the product chamber without dead corners. System pressure up to 230 psi.

O-ring sealing between pump housing and cover

Mechanical seal

GEA Hilge offers the following seal designs:

- Single mechanical seal
- Single mechanical seal, flushed (Quench)
- Double mechanical seal

The pumps of the GEA Hilge TP range are equipped with single internal mechanical seals optimally arranged in the pump.

This ensures efficient lubrication and cooling of the mechanical seal. CIP and SIP-capability is fulfilled according to hygienic design criteria.

The standard material for the mechanical seals is carbon/SiC with EPDM elastomers. Other executions and materials are available on request.

For further information on mechanical seals, see page 39.

Design variants

Standard version	Description
GEA Hilge TP	Horizontal installation, plug-in shaft, standard motor

GEA Hilge offers each pump range in different designs. See design variants on page 33.

Design K

GEA Hilge sterile and process pumps in compact K design require small installation space. The pump is equipped with a plug-in shaft.

The modular design enables numerous installation designs.

GEA Hilge TP on 3-A stainless steel adjustable feet

GEA Hilge TP on stainless steel adjustable feet

Designs

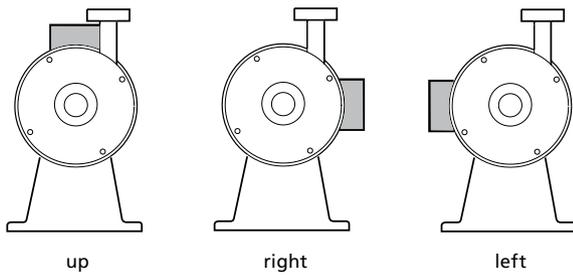

The following overview lists common designs, installations and versions:

- On 3-A stainless steel adjustable feet
- On stainless steel adjustable feet

Additional versions on request.

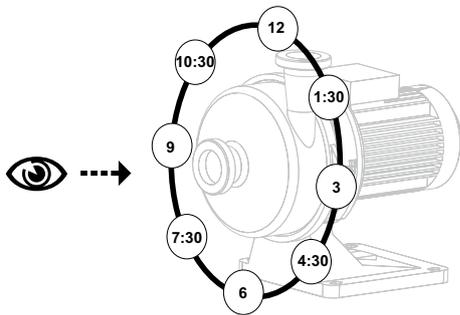

Terminal box position

This terminal box positions are possible for all pumps without shroud.

Possible terminal box positions

Positioning of discharge port and terminal box

Positioning of discharge port and terminal box for horizontal pumps

Pump connections

GEA Hilge offers the following standard connections for the GEA Hilge TP pump range:

- Tri clamp

Additional connections such as sterile connections in accordance with DIN 11853, SMS, RJT, DIN or ISO clamp connections are available on request.

Selected connections also available with drain port. You can find additional information in the connection selection guide from page 36 to 38.

Noise emissions

Measured values according to DIN EN ISO 3746 for pump units, measurement uncertainty 3 dB(A).

Type	Lpfa [dB (A)]
TP 1020	63
TP 1540	67
TP 2030	74
TP 2050	74
TP 2575	77
TP 3050	74
TP 5060	74
TP 7060	77
TP 8050	78
TP 8080	77
TP 16040	83

The noise emissions of a pump are significantly affected by the given application. The values given here therefore serve only as a guide. Please contact GEA for more detailed information.

Features and benefits

Features
EHEDG certified and consistent implementation of hygienic design
Pump casing made from rolled steel with thick walls
Modular construction. Connections, mechanical seal, placements, etc. may be combined on an individual basis
Motors with special voltages and frequencies, special coatings, special connections and sizes, drain ports and much more
Service kits for all standard mechanical seals
Task-specific certificates for components

Benefits
Process safety and optimal cleaning ability
Durable and robust
Duty-point-precise sizing, good NPSH value and coefficient of performance
Low spare parts inventory
Service-friendliness

Motor protection

Three-phase motors should be connected to a motor-protective circuit breaker.

All three-phase mains-operated standard motors can be connected to an external frequency converter. When a frequency converter is connected, the motor isolation is often overloaded, making the motor louder than during normal operation. In addition, large motors will be exposed to bearing currents caused by the frequency converter.

The following should be taken into account when operating a frequency converter:

- In the event of special noise protection requirements, motor noise can be reduced by using a dU/dt filter between the motor and the frequency converter. For noise-sensitive environments, we recommend using a sinus filter.
- The length of the cable between motor and frequency converter affects the motor load. For this reason, check whether the cable length corresponds to the specifications issued by the supplier of the frequency converter.
- For supply voltages between 500 and 690 V, fit either a dU/dt filter to reduce voltage peaks, or use a motor with reinforced insulation.
- For supply voltages of 690 V, use a motor with reinforced insulation, and fit a dU/dt filter.

Design

The motors are totally enclosed, fan-cooled, C-face standard motors with main dimensions and electrical tolerances acc. NEMA-MG1.

In order to ensure correct operation (depending on the application and the medium), single or single mechanical flushed seal systems can be supplied. The mechanical seal is optimally placed inside the pump. This ensures efficient lubrication and cooling of the mechanical seal, while also

ensuring CIP (Cleaning In Place) and SIP (Sterilisation In Place) capability. The standard material for the mechanical seals are carbon/stainless steel or SiC/SiC with EPDM or FKM (Viton) elastomers.

Mechanical seals

The operating range of the seal depends on the liquid, the type of seal, the operating pressure and the liquid temperature.

The seal types described below are standard seal types; other seals are available on request.

Version	Material pairs stationary seal face/O-rings	Max. pressure	Max. temperature
Encapsulated spring	silicon carbide /silicon carbide /EPDM silicon carbide /silicon carbide /FKM carbon/stainless steel/EPDM carbon/stainless steel/FKM carbon/SiC/EPDM carbon/SiC/FKM	232 psi	23 to 212 °F

Special seals available in different materials up to 365 psi.

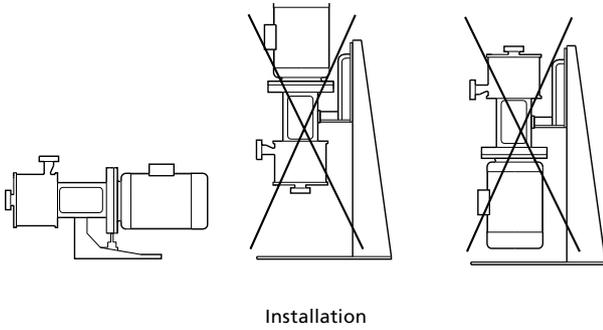

Mechanical seal arrangements

Arrangement	Design	Components
Double-acting mechanical seal		11: Slide ring holder 120.1: Face seal ring, primary 120.5: Stationary seal ring 120.6: Face seal, secondary
Single-acting mechanical seal		100.1: Face seal ring 100.2: Stationary seal ring 110.6: Spring
Single-acting mechanical seal, flushed		11: Slide ring holder 100.1: Face seal ring 100.2: Stationary seal ring 110.1: Shaft protection sleeve 110.2: Shaft seal 110.6: Spring

Mechanical installation

GEA Hilge TP

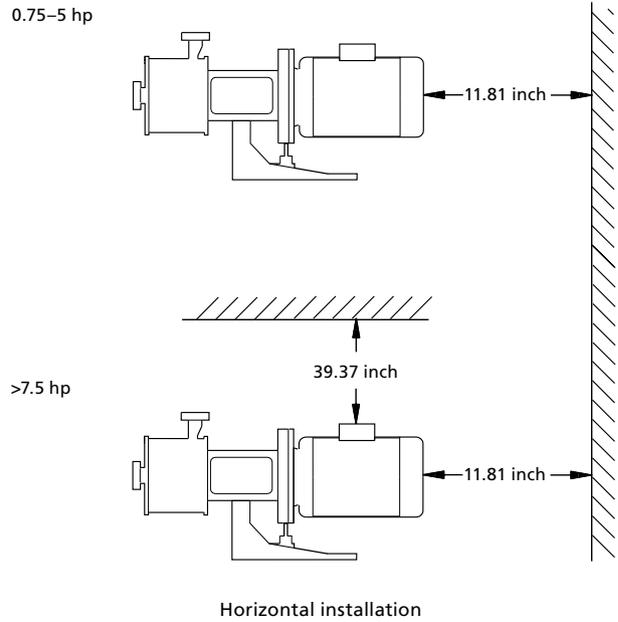

Never install the pump vertically!

Space requirements

Horizontal installation

- Pumps fitted with motors up to and including 5.0 hp require an 11.81 inch clearance behind the motor.
- Pumps fitted with motors of 7.5 hp and up require at least a 1 meter clearance above the motor and 11.81 inch behind it to allow the use of lifting equipment.

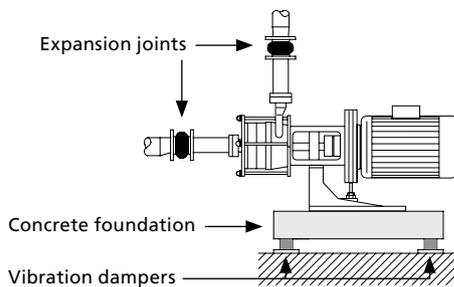

Elimination of noise and vibrations

In order to achieve optimum operation and minimum noise and vibration, consider vibration dampening of the pump. Generally, always consider this for pumps with motors above 15 hp. Smaller motors, however, may also cause undesirable noise and vibration.

Noise and vibration are generated by the rotation in the motor and pump and by the flow in the pipework and fittings. The effect on the environment is subjective and depends on correct installation and the state of the remaining system.

Foundation

Vibration dampening is best achieved by installing the pumps on a plane and rigid concrete foundation.

Example of a pump foundation

As a guideline, the weight of the concrete foundation should be 1.5 times the pump weight.

Vibration dampers

To prevent vibrations from being transmitted to the building, we recommend that you isolate the pump foundation from buildings by means of vibration dampers.

The selection of the correct vibration dampers requires the following data:

- Forces that will be transmitted through the vibration dampers
- Motor speed, taking speed control into account as needed
- Required dampening in % (suggested value is 70 %).

The right damper varies from installation to installation, and the wrong damper may increase the vibration level. Vibration dampers should therefore be sized by the supplier.

Expansion joints

If the pump is installed on a pedestal with vibration dampers, expansion joints must always be fitted on the pipeline connections. This is important to prevent the pump from "hanging" in the connections.

Install expansion joints in order to

- absorb expansion/contractions in the pipework caused by variable liquid temperatures
- reduce mechanical strains that occur in connection with pressure surges in the plant
- isolate mechanical structure-borne noise in the pipework (only rubber bellows expansion joints).

Note: Do not install expansion joints to compensate for inaccuracies in the pipework such as center displacement of flanges.

Fit expansion joints at a distance of at least 1 to 1.5 times the nominal flange diameter away from the pump on the suction as well as on the discharge side. This will prevent the development of turbulence in the expansion joints, resulting in better suction conditions and a minimum pressure loss on the discharge side.

We always recommend expansion joints with limiting rods for flanges larger than DN 100/4".

The pipes should be anchored so that they do not stress the expansion joints and the pump. Follow the supplier's instructions and pass them on to advisers or pipe installers.

The values for density and viscosity given here are ratios and can deviate in practice.

Technical data of the standard version

Materials	Pump housing: 316L (1.4404), deep-drawn Impeller: 316L (1.4409), precision casting
Connections	Tri-Clamp ASME BPE/DIN 32676
Nominal width of connections	Suction side 2", pressure side 1½"
Mechanical seal	Single-acting, material C / SIC / EPDM
Static seals	EPDM (FDA, USP Class VI, 3-A)
Motor	Standard motor: NEMA-Motor, 3-phase, 208-230V/460V, C-face with foot, IP55, ISO-Class F, incl. PTC thermostat, premium efficiency
Documentation	Operating instructions, declaration of conformity
Flow rate	Max. 20 m³/h (86 US gpm)
Pump head	Max. 24 m (77 ft)
Housing pressure	Max. 10 bar (145 psi)
Certificates	

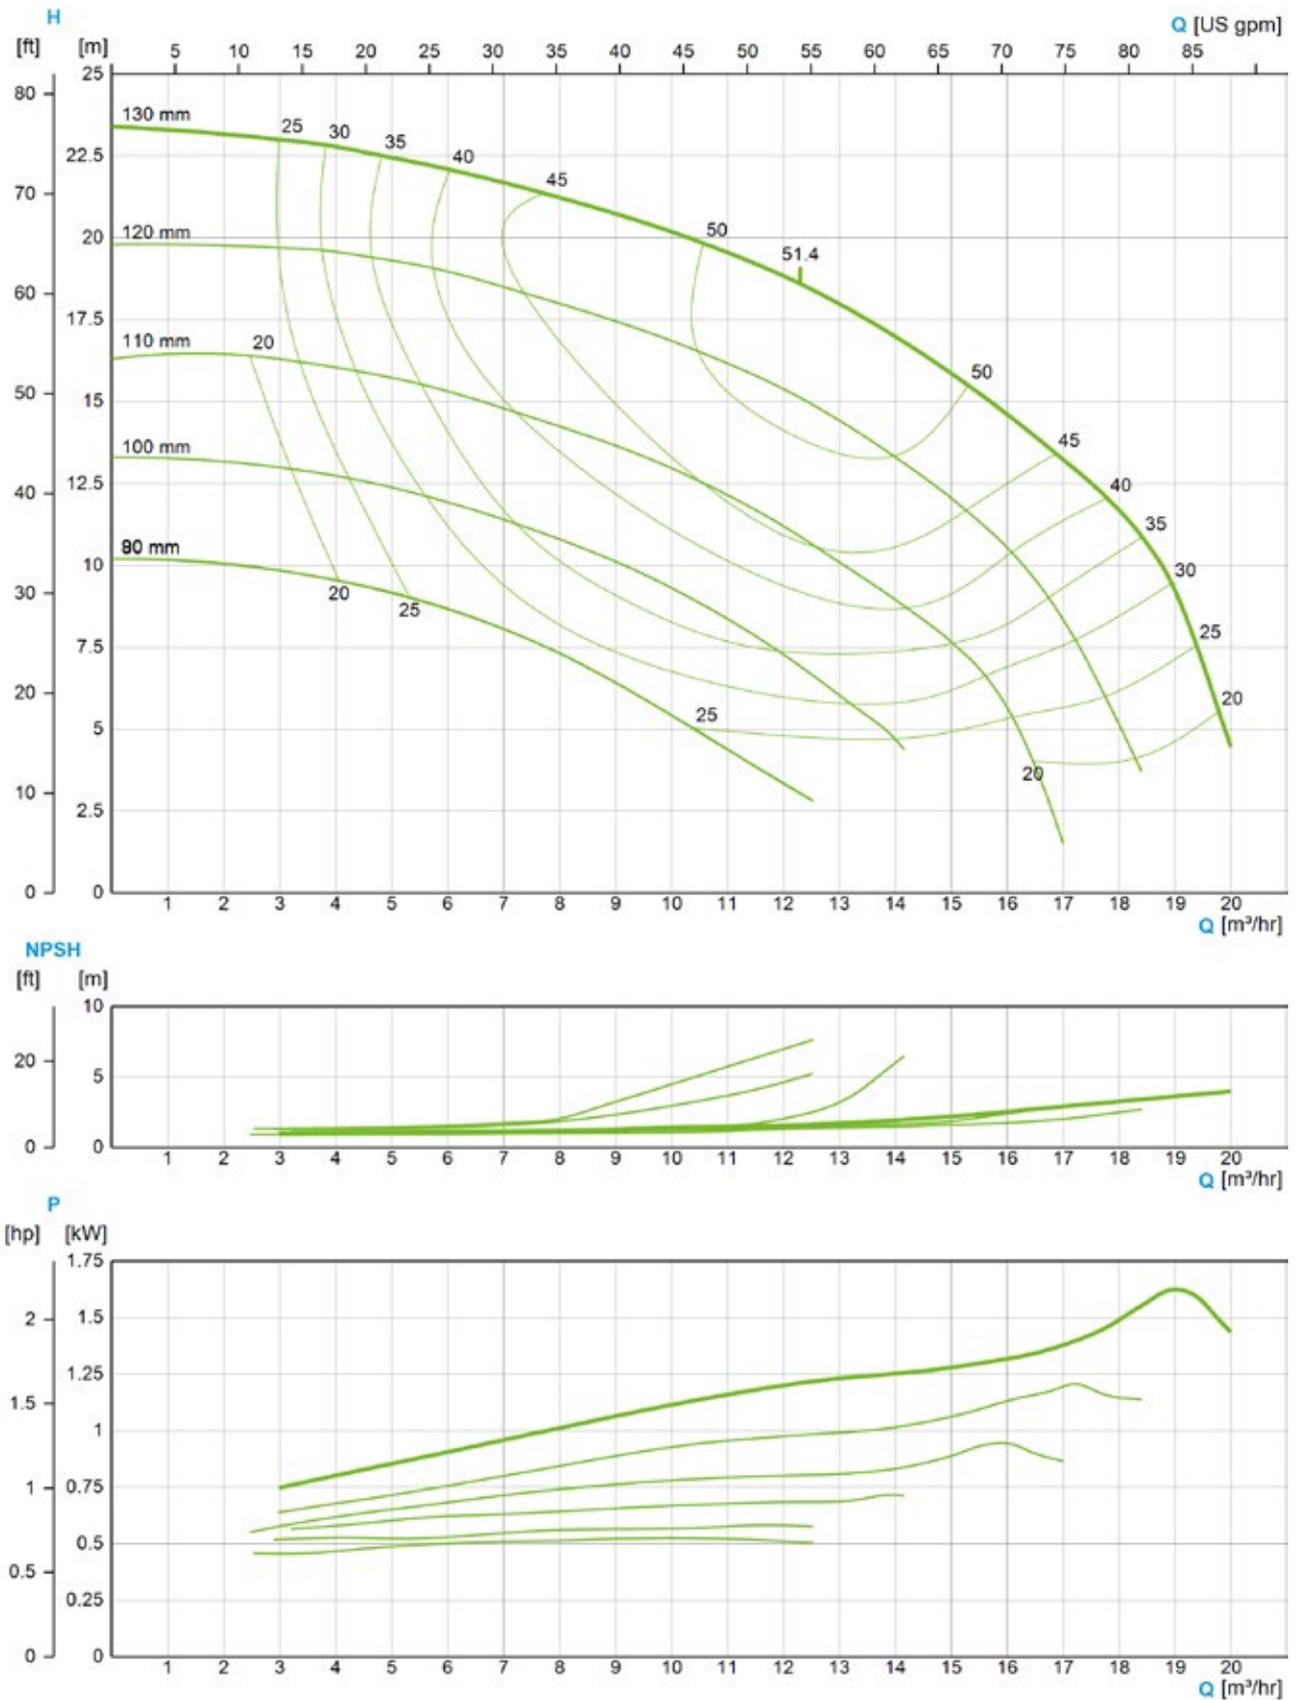

Further options see page 150 (Composition of Order Code)

Technical data of the standard version

Materials	Pump housing: 316L (1.4404), deep-drawn Impeller: 316L (1.4409), precision casting
Connections	Tri-Clamp ASME BPE/DIN 32676
Nominal width of connections	Suction side 2"; 2 1/2"; 3", pressure side 2"
Mechanical seal	Single-acting, material C / SIC / EPDM
Static seals	EPDM (FDA, USP Class VI, 3-A)
Motor	Standard motor: NEMA-Motor, 3-phase, 208-230V/460V, C-face with foot, IP55, ISO-Class F, incl. PTC thermostat, premium efficiency
Documentation	Operating instructions, declaration of conformity
Flow rate	Max. 36 m³/h (158 US gpm)
Pump head	Max. 60 m (197 ft)
Housing pressure	Max. 16 bar (232 psi)
Certificates	

Further options see page 150 (Composition of Order Code)

Technical data of the standard version

Materials	Pump housing: 316L (1.4404), deep-drawn Impeller: 316L (1.4409), precision casting
Connections	Tri-Clamp ASME BPE/DIN 32676
Nominal width of connections	Suction side 3"; 4", pressure side 2"; 2½"; 3"
Mechanical seal	Single-acting, material C / SIC / EPDM
Static seals	EPDM (FDA, USP Class VI, 3-A)
Motor	Standard motor: NEMA-Motor, 3-phase, 208-230V/460V, C-face with foot, IP55, ISO-Class F, incl. PTC thermostat, premium efficiency
Documentation	Operating instructions, declaration of conformity
Flow rate	Max. 120 m³/h (528 US gpm)
Pump head	Max. 90 m (295 ft)
Housing pressure	Max. 16 bar (232 psi)
Certificates

Technical data of the standard version

Materials	Pump housing: 316L (1.4404), deep-drawn Impeller: 316L (1.4409), precision casting
Connections	Tri-Clamp ASME BPE/DIN 32676
Nominal width of connections	Suction side 2"; 2½"; 3", pressure side 2"; 2½"; 3"
Mechanical seal	Single-acting, material C / SIC / EPDM
Static seals	EPDM (FDA, USP Class VI, 3-A)
Motor	Standard motor: NEMA-Motor, 3-phase, 208-230V/460V, C-face with foot, IP55, ISO-Class F, incl. PTC thermostat, premium efficiency
Documentation	Operating instructions, declaration of conformity
Flow rate	Max. 36 m³/h (158 US gpm)
Pump head	Max. 16 m (53 ft)
Housing pressure	Max. 16 bar (232 psi)
Certificates

Motor dimensions depend on the motor manufacturer and execution. The shown motor dimensions indicate the size for the standard motor
 * Option: drain valve (dimensions and other drainage variants on request)
 Weight: net-weight without packaging

The flow charts are based on water, temperature 59 °F

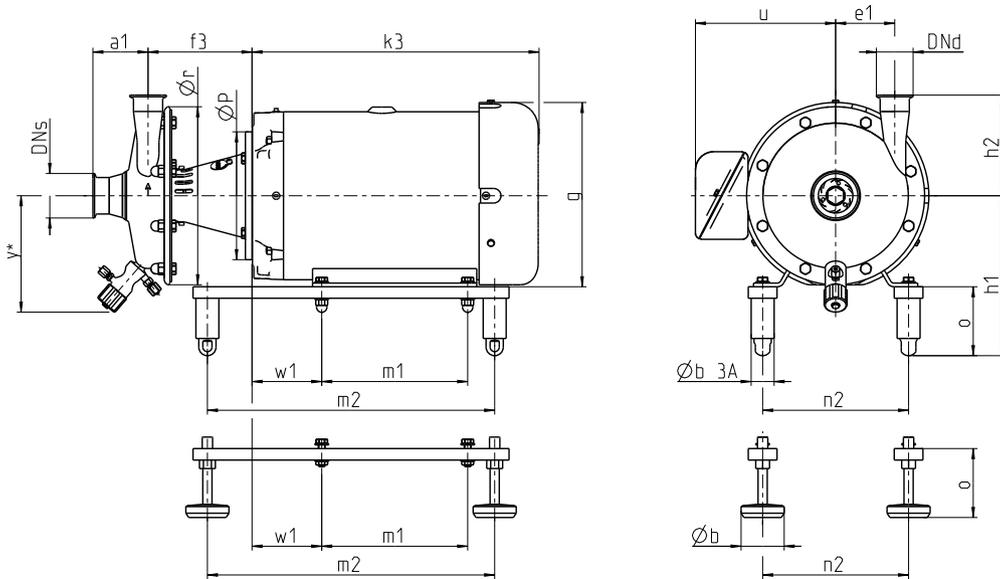

Technical data of the standard version

Materials	Pump housing: 316L (1.4404), deep-drawn Impeller: 316L (1.4409), precision casting
Connections	Tri-Clamp ASME BPE/DIN 32676
Nominal width of connections	Suction side 2½"; 3", Pressure side 1½"
Mechanical seal	Single-acting, material C / SIC / EPDM
Static seals	EPDM (FDA, USP Class VI, 3-A)
Motor	Standard motor: NEMA-Motor, 3-phase, 208-230V/460V, C-face with foot, IP55, ISO-Class F, incl. PTC thermostat, premium efficiency
Documentation	Operating instructions, declaration of conformity
Flow rate	Max. 44 m³/h (194 US gpm)
Pump head	Max. 62 m (203 ft)
Housing pressure	Max. 16 bar (232 psi)
Certificates	

Further options see page 150 (Composition of Order Code)

Technical data of the standard version

Materials	Pump housing: 316L (1.4404), deep-drawn Impeller: 316L (1.4409), precision casting
Connections	Tri-Clamp ASME BPE/DIN 32676
Nominal width of connections	Suction side 3"; 4", Pressure side 2"; 2½"; 3"
Mechanical seal	Single-acting, material C / SIC / EPDM
Static seals	EPDM (FDA, USP Class VI, 3-A)
Motor	Standard motor: NEMA-Motor, 3-phase, 208-230V/460V, C-face with foot, IP55, ISO-Class F, incl. PTC thermostat, premium efficiency
Documentation	Operating instructions, declaration of conformity
Flow rate	Max. 150 m³/h (660 US gpm)
Pump head	Max. 82 m (269 ft)
Housing pressure	Max. 16 bar (232 psi)
Certificates

Technical data of the standard version

Materials	Pump housing: 316L (1.4404), deep-drawn Impeller: 316L (1.4409), precision casting
Connections	Tri-Clamp ASME BPE/DIN 32676
Nominal width of connections	Suction port 2"; 2½"; 3", pressure port 2"
Mechanical seal	Single-acting, material C / SIC / EPDM
Static seals	EPDM (FDA, USP Class VI, 3-A)
Motor	Standard motor: NEMA-Motor, 3-phase, 208-230V/460V, C-face with foot, IP55, ISO-Class F, incl. PTC thermostat, premium efficiency
Documentation	Operating instructions, declaration of conformity
Flow rate	Max. 21 m³/h (53 US gpm)
Pump head	Max. 22 m (69 ft)
Housing pressure	Max. 16 bar (232 psi)
Certificates

Certificates/Documentation

- 3-A Sanitary Standard
- Inspection certificate 3.1 acc. to DIN EN 10204
- Test report 2.2 acc. to DIN EN 10204
- EHEDG
- UL
- Further certificates and documentation: _____
- FDA declaration of conformity
- Surface roughness test report
- Delta ferrite test report
- CSA
- cURus/cULus

Further Information

* Fields marked with an asterisk are mandatory for a pump selection

2.1		Works certificate according to DIN EN 10204: Declaration of the compliance with the order. This certificate is issued by the manufacturer.
2.2		Test report according to DIN EN 10204: Declaration of the compliance with the order under specification of the results of non-specific tests. This certificate is issued by the manufacturer.
3.1		Inspection certificate 3.1 according to DIN EN 10204: Declaration of the compliance with the order under specification of the results of specific tests. This certificate is issued by an authority which is independent of manufacturing and is validated by the manufacturers authorized inspection representative.
3-A		3-A Sanitary Standards, Inc. (3-A SSI) is an independent, non-profit corporation dedicated to advancing hygienic equipment design for the food, beverage, and pharmaceutical industries.
AS-i		Actuator Sensor interface. BUS system for the lowest field level.
ASME-BPE		Standard of the ASME's – bioprocessing equipment association
ATEX		Atmosphères Explosibles. ATEX comprises the directives of the European Union in the area of explosion protection. For one thing, this is the ATEX equipment directive 94/9/EC, for another, the ATEX workplace directive 1999/92/EC.
cCSAus		Test of a product by CSA according to applicable safety standards in Canada and the USA.
CE		Conformité Européenne. By affixing the CE mark, the manufacturer confirms that the product complies with the European directives applicable to the specific product.
CSA		Canadian Standards Association. A non-governmental Canadian organization which issues standards as well as checking and certifying the safety of products. It is now globally active.
cULus		Test of a product by UL according to applicable safety standards in Canada and the USA.
DIN EN ISO 9001:2015		This norm is the basis for a multitude of varied organizations in different industries worldwide for quality assurance and quality management. It is the most widespread standards of ISO (International Organisation for Standardization).
EAC		Euroasion conformity. The symbol is used similar to the European CE mark. The manufacturer or supplier confirms that the machine has passed all necessary compliance procedures in one of the Member States of the customs union.
EG 1935/2004		Materials in contact with the product used in pumps from GEA Hilge are in accordance with EC regulation 1935/2004. This defines a general framework for materials and objects intended to come into contact with foodstuffs.
EHEDG		European Hygienic Engineering & Design Group. European supervisory authority for foodstuffs and pharmaceuticals. This authority issues approvals and certificates for products and materials that are used in the foodstuffs and pharmaceuticals industries.
FDA		Food and Drug Administration. US supervisory authority for foodstuffs and pharmaceuticals. This authority issues approvals and certificates for products and materials that are used in the foodstuffs and pharmaceuticals industries.
UL		Underwriters Laboratories. An organization founded in the USA for checking and certifying products and their safety.
USP Class VI		The United States Pharmacopeial Convention (USP) is a scientific nonprofit organization that sets standards to help protecting public health. Class VI administer tests and impacts of material and their substances on animal and human tissues.

Abbreviation	Explanation
°C	Degrees Celsius, unit of measurement for temperature
°F	Degrees Fahrenheit, unit of measurement for temperature
3D	Three-dimensional
A	Ampere, unit of measurement of current intensity or Output, term used in automation
AC	Alternating Current
ADI free	All elastomer compounds are free of animal-derived ingredients
AISI	American Iron and Steel Institute, association of the American steel industry
ANSI	American National Standards Institute, American body for standardizing industrial processes
approx.	approximately
AS-i	Actuator Sensor interface, standard for fieldbus communication
ASME	American Society of Mechanical Engineers, professional association of mechanical engineers in the USA
ASME-BPE	Standard of the ASME's – bioprocessing equipment association
ATEX	Atmosphères Explosibles, synonymous with the directives of the European Union for potentially explosive areas
bar	Unit of measurement for pressure. All pressure values [bar/psi] refer to positive pressure [bar _g /psi _g], unless specifically stated otherwise.
bar _g	Unit of measurement for pressure relative to atmospheric pressure
CAN	Controller Area Network; asynchronous serial bus system
CE	Conformité Européenne, administrative symbol for the free movement of industrial products
CIP	Cleaning In Place, designates a process for cleaning technical process systems.
CRN	Canadian Registration Number, is issued by a Canadian Jurisdiction and covers pressure vessels, fittings, or pressure piping. It is a necessary authorization allowing these components to be in operation in Canada.
CSA	Canadian Standards Association, a non-governmental Canadian Standardization organization
Cv	The Cv value corresponds to the water flow rate through a valve (in US gal / min) at a pressure differential of 1 PSI and a water temperature of 5 °C to 30 °C. kv = 14,28 Cv (USA).
Cvs	The Cv values of a valve at nominal stroke (100 % opening) is designated the Cvs value.
dB	Decibel, one tenth of a bel, named after Alexander Graham Bell and used for identifying levels and dimensions
DC	Direct Current

Abbreviation	Explanation
DIN	Deutsches Institut für Normung e. V. Standardization organization in the Federal Republic of Germany, DIN = synonym for standards issued by the organization
DIP	Dual Inline Package, design of a switch
DN	Diameter Nominal, DIN nominal width
Device Net	Network system used in the automation industry to interconnect control devices for data exchange
E	Input, term used in automation
EAC	Certification of technical conformity from the customs union of Russia/Belarus/Kazakhstan
Pressure Equipment Directive 97/23/EC	Directive of the European Parliament and the Council Directive for layout and conformity evaluation for pressure equipment and assemblies with a maximum pressure (PS) of more than 0.5 bars.
EG No. 1935/2004	Regulation of the European Parliament which lays down common rules for materials which come, or may come, into contact with food, either directly or indirectly.
EHEDG	European Hygienic Engineering and Design Group. Consortium of equipment manufacturers, food industries, research institutes as well as public health authorities
EN	European standard, rules of the European Committee for Standardization
EPDM	Ethylene propylene diene rubber, acronym acc. to DIN/ISO 1629
Ex	Synonym for ATEX
FDA	Food and Drug Administration, official foodstuffs monitoring in the United States
FEM calculation	Finite Element Method; calculation process for simulating solids
FKM	Fluorinated rubber, acronym acc. to DIN/ISO 1629
GOST	Gosudarstvennyy Standart, Certification of conformity for components according to standards and regulations of the Russian Federation
H	Henry, unit of measurement for inductance
HNBR	Hydrated acrylonitrile butadiene rubber, acronym acc. to DIN/ISO 1629
Hz	Hertz, unit of frequency named after Heinrich Hertz
I	Formula symbol for electrical current
IEC	International Electrotechnical Commission, international standardization organization for electrical and electronic engineering
IP	Ingress Protection/International Protection, index of protection class acc. to IEC 60529
IPS	Iron Pipe Size, American pipe dimension
ISA	International Society of Automation, international US organization of the automation industry

Abbreviation	Explanation
ISO	International Organization for Standardization, international organization that produced international standards, ISO = synonym for standards from the organization
kg	Kilogram, unit of measurement for weight
Kv	The Kv value corresponds to the water flow rate through a valve (in m ³ /h) at a pressure differential of 0.98 bar and a water temperature of 5 °C to 30 °C.
Kvs	The Kv values of a valve at nominal stroke (100 % opening) is designated the Kvs value
L	Conductive
LED	Light-Emitting Diode
mm	Millimeter, unit of measurement for length
M	Metric, system of units based on the meter or Mega, one million times a unit
m ³ /h	Cubic meters per hour, unit of measurement for volumetric flow
max.	Maximum
NAMUR	Standardization working association for measuring and control technology in the chemical industry, synonym for the interface type of the organization, especially for potentially explosive atmospheres
NC	Normally Closed; valve or solenoid valve control which is closed in idle status
NO	Normally Open; valve or solenoid valve control which is open in idle status
NOT-element	Logic element, NOT gate
NPN	Signal transmission against reference potential, current-consuming
NPT	National Pipe Thread, US thread standard for self-sealing pipe fittings
OD	Outside Diameter, pipe dimension
ODVA	Open DeviceNet Vendor Association, global association for network standards
PA 12/L	Polyamide
Pg	Armored thread
PN	Nominal pressure for pipeline systems according to EN 1333, rated pressure in bar at room temperature (20 °C)
PNP	Signal transmission against reference potential, current-supplying
PPO	Polyphenylene oxide, thermoplastic material
PS	Maximum permitted operating pressure at which the components can operate safely at maximum allowable temperature (TS)

Abbreviation	Explanation
psi	Unit of measurement for pressure, pound-force per square inch, 1 psi = 6894.75 Pa. All pressure values [bar/psi] refer to positive pressure [$\text{bar}_g/\text{psi}_g$], unless specifically stated otherwise.
psi_g	Unit of measurement for pressure relative to atmospheric pressure
PV	Solenoid valve
R_a in μm	Average roughness value, describes the roughness of a technical surface
International Protection-Code IP67, IP66, IP69K	Classifies and rates the degree of protection provided against intrusion dust, accidental contact, and water
SES	GEA Tuchenhagen control head for Ex areas, control top system of GEA Tuchenhagen
SET-UP	Self-learning installation, the SET-UP procedure carries out all necessary settings for generating messages during commissioning and maintenance.
SIP	Sterilization in Place, refers to a process for cleaning technical process systems
SMS	Svensk Mjöl Standard, Scandinavian pipe dimension
SW	Indicates the size of a tool spanner, "Schlüsselweite"
TA-Luft VDI 2440	If a product is certified according to TA Luft it meets the requirements for proof of high grade performance according to TA Luft of $1.0 \times 10^{-4} \text{ mbar} \times l / (s \times m)$ at service conditions under the VDI guideline 2440. The product will hence be tested for tightness.
TS	Maximum permitted operating temperature
UL	Underwriters Laboratories, a certification organization established in the USA
USP Class VI	The United States Pharmacopeial Convention (USP) is a scientific nonprofit organization that sets standards to help protecting public health. Class VI administer tests and impacts of material and their substances on animal and human tissues.
UV	Ultraviolet, ultraviolet radiation is a wavelength of light
V	Volt, unit of measurement for voltage
VMQ	High-polymer vinyl methyl polysiloxane, silicone rubber, MVQ = synonym
W	Watt, unit of measurement for power
Y	Control air connection for the working cylinder, designation from pneumatic systems
μ	Micro, one millionth of a unit
Ω	Ohm, the unit of electrical resistance named after Georg Simon Ohm

We live our values.

Excellence • Passion • Integrity • Responsibility • GEA-versity

“Engineering for a better world” is the driving and energizing principle connecting GEA’s workforce. As one of the largest systems suppliers, GEA makes an important contribution to a sustainable future with its solutions and services, particularly in the food, beverage and pharmaceutical sectors. Across the globe, GEA’s plants, processes and components contribute significantly to the reduction of CO₂ emissions, plastic use as well as food waste in production.

GEA is listed on the German MDAX and the STOXX® Europe 600 Index and also included in the DAX 50 ESG and MSCI Global Sustainability indexes.
