

GEA Farm Technologies

# An "EGO" for everyone ...

... the lifting floor for top posture marks.

GEA Milking & Cooling | [WestfaliaSurge](#)

GEA Farm Technologies – The right choice.

# The floor which brings you up to a healthy ergonomic height

Whoever works hard for their milk money, shouldn't end up with a crooked back. The EGO lifting floor from GEA Farm Technologies means you can now milk in your most comfortable position. Just a simple touch of the finger is all it takes to bring the working area up to the desired level. You can easily discover the ideal setting for your own body size and, in group milking parlours, you can also read-off from the optical display. Regardless of which milking parlour you choose or chose, the EGO lifting floor brings every milker up to their own personal, ergonomic working height. This way, totally automatically, you'll get top marks for posture.

Take note of the different versions:

- EGO 100 for group milking parlours
- EGO 400 for AutoRotor inside milker
- EGO 900 for AutoRotor outside milker

Really just a formality as whichever parlour you have, its ideal

Whether you have a group milking parlour or a milking carousel, the low-maintenance EGO lifting floor is made to match your parlour. The considerable lifting height of 380 mm permits continuous matching of your body size to the depth of the pit. Consequently EGO has sufficient reserves for almost any body size.

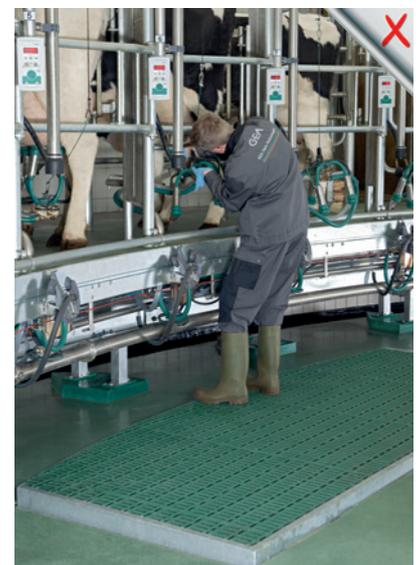

EGO 400

*Incorrect posture – stretched*

*Correct posture – ergonomic*

*Incorrect posture – bent*

# An EGO for everyone, the lifting floor for top posture marks

Look at it from the point of view of your body: whether pre-milking, positioning the cluster or teat dipping, considerable lever forces are continuously acting on your body and what you do several hundred times a day without even thinking about it, starts to add up over the years. Ultimately its just a question of good posture, so the risk of incorrect body posture should not be treated lightly. A lifting floor provides a noticeable benefit. In view of increasing herd sizes, longer milking times, and even different sized breeds of cow, upright body posture is all important in daily milking.

EGO 100

*With the EGO 100 lifting floor, ergonomic body posture means noticeable relief for your body.*

## Ergonomic advantages of new-build or upgrade

- Centrally raised floor with 3% slope for additional muscle relief (option for group milking parlours)
- Easily visible display of the set lifting height (in group milking parlours)
- Low maintenance system, hot-galvanised or stainless steel version (recommended for contact with acids) available
- High load bearing capacity of up to 12 persons when stationary
- Viable installation expense
- Simple installation due to pre-assembled modules
- Installation in subway systems is possible
- EGO 100r sprung floor (later upgrading to lifting floor adjustment is possible)

EGO 900

*The EGO 900 lifting floor promotes tireless working with the AutorRotor outside milker.*

*The no-slip plastic grating provides a soft standing surface ensuring comfortable standing and walking.*
