

FRIDA AND THE MYSTERIOUS ROBOT

Enthusiasm at Sunshine Farm –
where has the new feed come from?

Frida: Hello, my name is Frida.

Me and my 140 friends live here at Sunshine Farm in Boenen. Boenen is a lovely, small town in western Germany.

Frida: Our farmer's name is Frank.
He always gives us delicious feed to eat.

But we can see that Frank has to work hard
to do this for us...

Frida: A little while ago, a GEA Dealer came to our farm. He talked to Frank about better ways to feed us which means less work for our farmer.

Alma: After they talked, they shook hands and the man said to Frank: "Congratulations on your new feeding robot from GEA, the DairyFeed F4500!" But we aren't exactly sure what a feeding robot is...

Here is a little puzzle for you:

Can you work out which number completes the last sum?

$$= 7$$

$$= 5 +$$

$$= 1 +$$

?

$$=$$

One week later ...

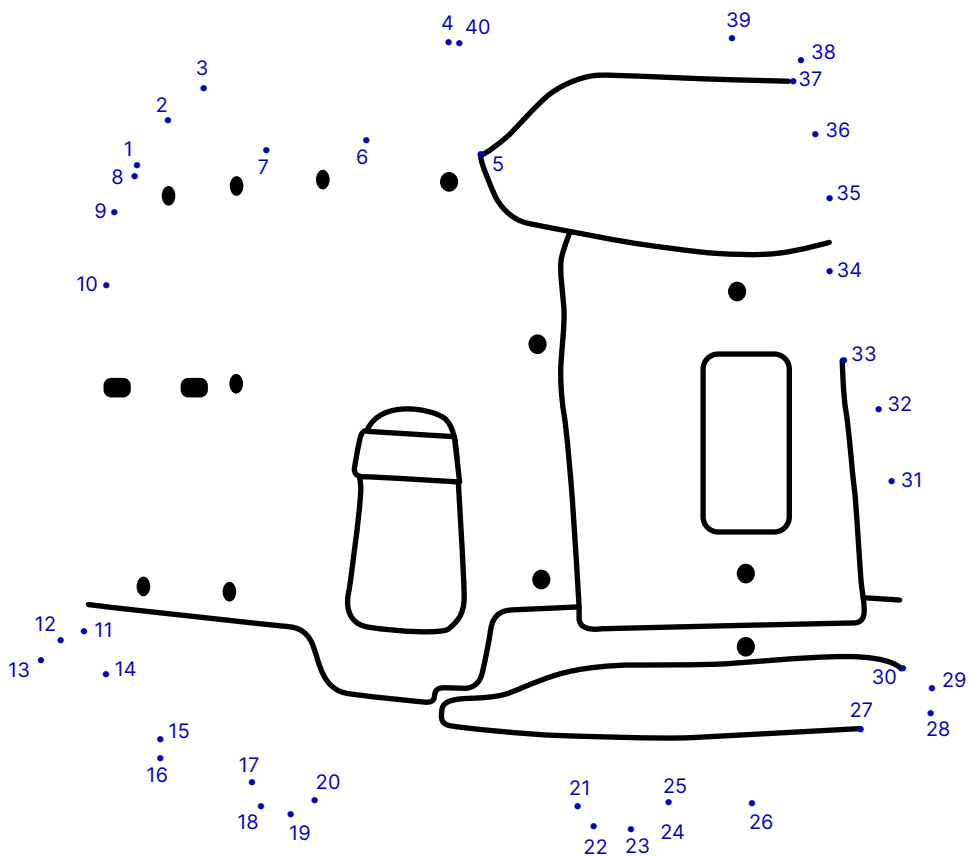

Frida: Hey girls, look over by the door!

Is that the new feeding robot?

It looks a bit strange. Let's find out...

Can you help Frida?

Join the dots from 1 to 40 in the correct order!

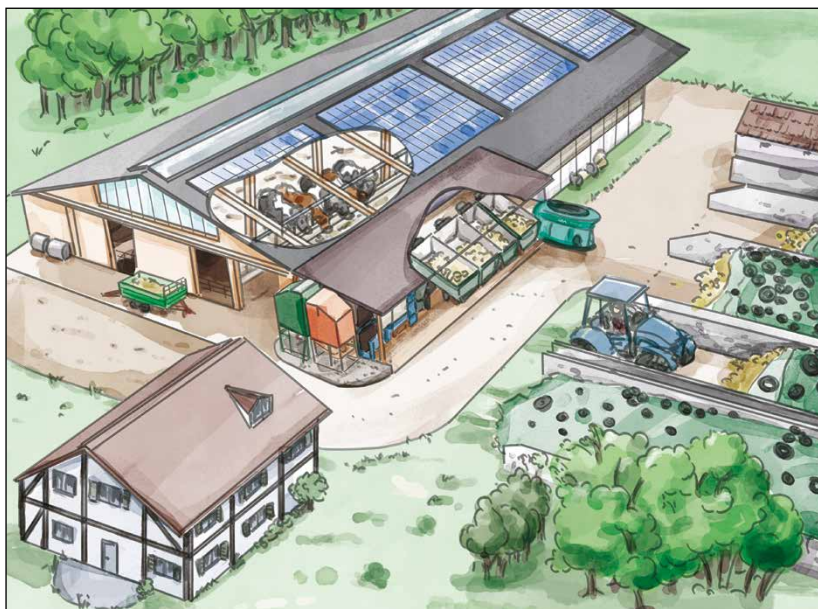

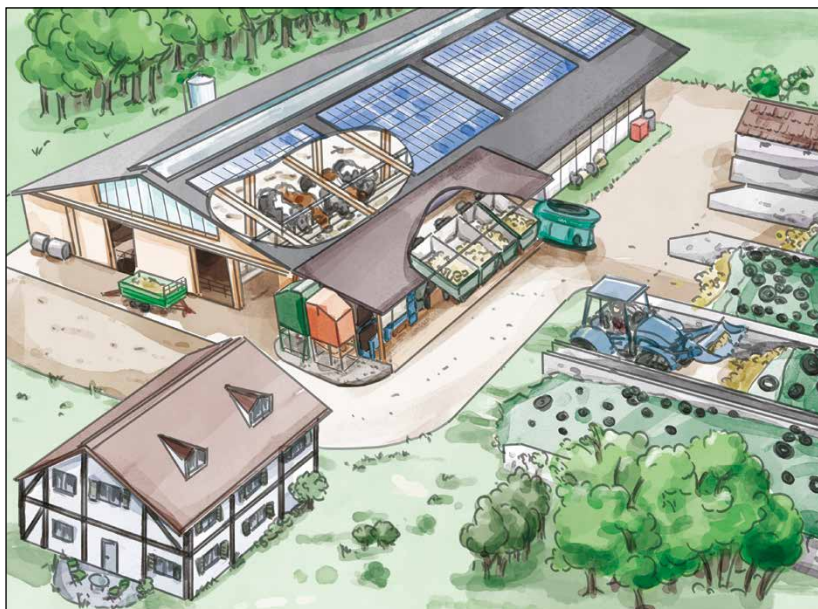

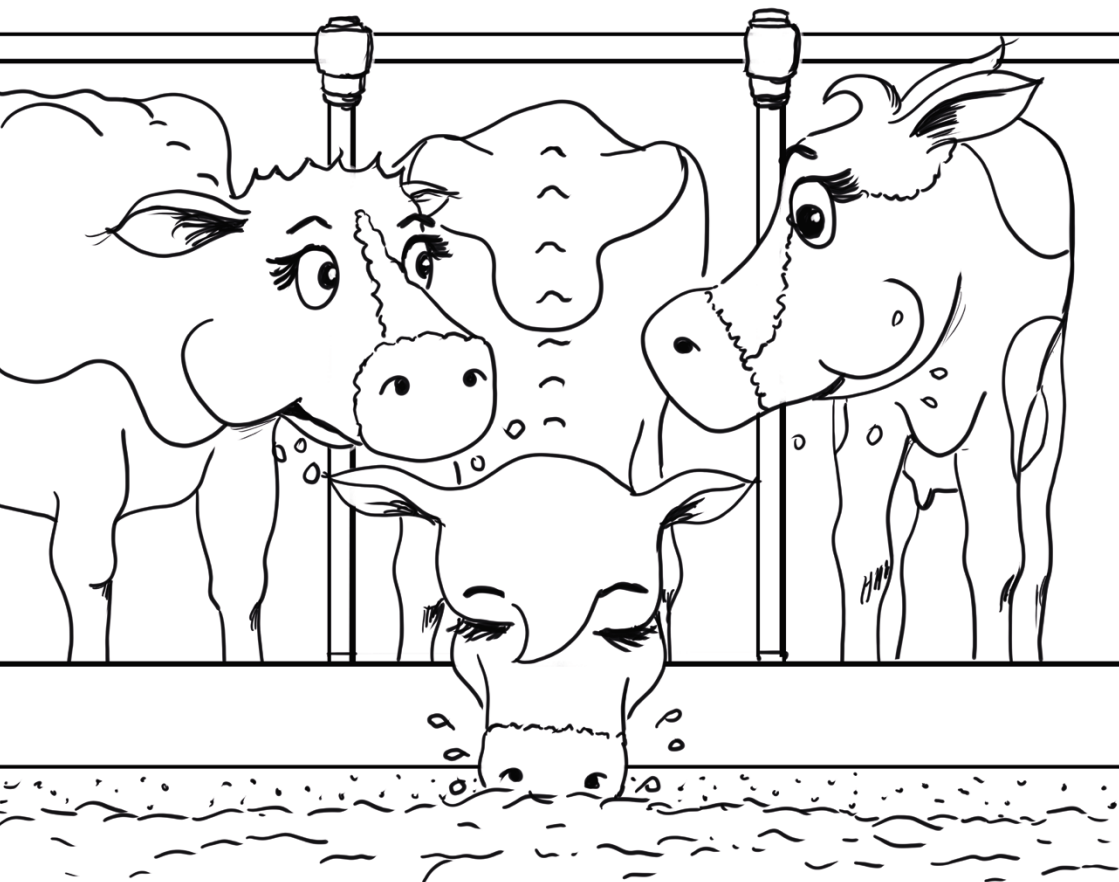

Frank: Calm down, my ladies!

Our new feeding robot is just making a map of our barn. It will only take a few minutes.

With this map it can give each group of you the right amount of feed. Including all your favourite ingredients and always freshly mixed!

Are these pictures really the same?
Find 7 differences and mark them with a cross.

Frida: Watch out, it's time!

The robot has just automatically distributed our feed for the first time. I can't wait to see how it tastes.

Alma: Mmmm, the perfect mixture!

Carla: And all made fresh!

Two hours later...

Frida: Look, here comes the robot with fresh feed again.

Carla: Super, that means we automatically get freshly mixed feed day and night!

Some pictures are missing! You will find them at the back of this book.
Cut them out and stick the missing pictures in the right boxes.

Frida: Hey Alma, look at Frank!

He has much more time for other things now.
When he comes to visit us in our barn, he only has
to check that everything is ok.

Alma: Frida, have you seen?

The GEA Dealer is visiting us again. I heard him talking to Frank about this cool GEA milking robot...

Frida: Do you mean the GEA DairyRobot R9500?

It would be great if we had one on the farm soon, too. Then we could get milked automatically whenever we wanted!
