

Labelling with no ifs, ands or buts

The new GEA TiroLabel sets new standards

It goes without saying that any efficient packaging system needs to include a labeller that can keep pace with even the highest demands. This is why GEA is now introducing the next generation of TiroLabel labellers: for unsurpassed, reliable, smooth and fast labelling that has yet to find its equal on the market!

Innovative and yet proven to work – this probably best describes the new TiroLabel. Because its development has brought GEA's many years of packaging and labelling know-how up to date. Many details were optimized, while handling and flexibility were once more improved.

Rely on innovative packaging solutions from a single source. With GEA and the new TiroLabel, every label is transformed into a precision landing.

This is what makes GEA TiroLabel so unique:

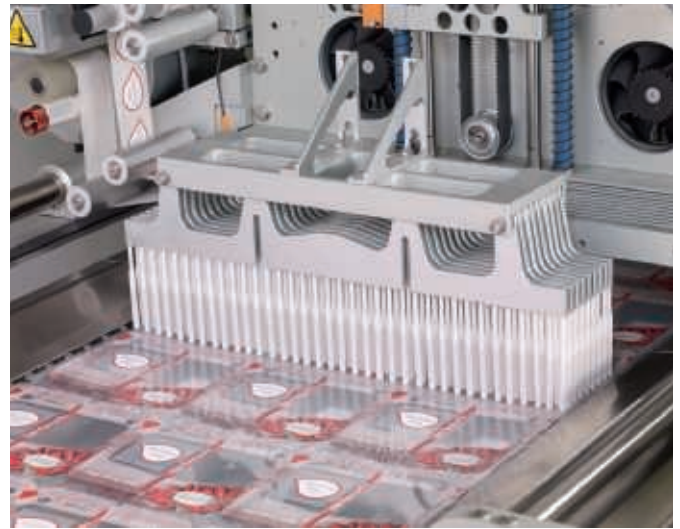

- Extremely high operating speed (e.g. slicer line in X.4 format with up to 50 strokes)
- Perfect integration into GEA thermoformer systems
- Simple to operate and programme
- Also labels sophisticated packaging with millimetre accuracy
- Fast and flexible conversion, also for special applications
- Reliable results, even on uneven surfaces
- Motor-driven positioning unit on top and bottom with spring-loaded pins enables non-pneumatic labelling
- Seamless integration into complete GEA packaging solutions

Something good made even better: the new GEA TiroLabel

The next generation of GEA TiroLabel labellers offers further developments and optimizations designed in close coordination with our customers and their practical needs.

All GEA TiroLabel innovations are geared towards making top quality packaging solutions smoother, more efficient and even faster. Thus, it is the perfect complement to GEA thermoformer systems.

Use the advantages offered by GEA packaging solutions from a single source. Our extensive range of highly customizable systems and components puts you in the ideal position to meet the constantly growing demands of the international food market.

The innovations of the GEA TiroLabel in detail:

- Motor-driven positioning unit on top and bottom with spring-loaded pins
- 50 % greater stroke of the spring-loaded pins (from 20 to 30 mm) for optimal handling of skin and top form applications
- Available in widths of 130 and 200 mm
- Lower overall labeller height for easier label changes
- Separate 10" touch panel on supporting arm as a standard feature
- New software with intuitive user interface for simple handling
- Recognition of empty packaging via sensor and suspension of the labelling process (optional feature)
- Automatic programme transmission from packaging system to labeller and LPM printer
- Improved access to the dispenser edge
- Simple maintenance and cleaning of positioning unit

Please contact us if you would like more information on how you can integrate the GEA TiroLabel labeller into highly efficient, customized packaging solutions. Your local GEA sales representative will be happy to provide you with more information.
